## **I. POLICY**

Camzyos (mavacamten) will require prior authorization to ensure it is used only when clinically appropriate. The process for initiating a prior authorization request can be found in policy PHARM 20.

1. PPMCO members are subject to the Priority Partners formulary, available at [www.ppmco.org](http://www.ppmco.org).
2. USFHP members are subject to prior authorization criteria, step-edits and days-supply limits outlined in the Tricare Policy Manual. Tricare Policy supersedes JHHC Medical/Pharmacy Policies. Tricare limits may be accessed at: [http://pec.ha.osd.mil/formulary\\_search.php?submenuheader=1](http://pec.ha.osd.mil/formulary_search.php?submenuheader=1)

## **II. POLICY CRITERIA**

- A. **Camzyos** may be approved for patients meeting the following:
  1. Patient is 18 years of age or older
  2. Documentation has been submitted showing the following:
    - a. Patient has a diagnosis of symptomatic obstructive hypertrophic cardiomyopathy (HCM) confirmed by echocardiogram or cardiac magnetic resonance
      - I. Diagnosis must not be due to a known infiltrative or storage disorder causing cardiac hypertrophy that mimicked obstructive HCM (i.e., Fabry disease, amyloidosis, or Noonan syndrome with left ventricular hypertrophy)
    - b. Patient has a New York Heart Association (NYHA) Class II or III functional status
    - c. Patient has a left ventricular ejection fraction (LVEF)  $\geq$  55%
    - d. Patient has a left ventricular outflow tract (LVOT) peak gradient  $\geq$  50 mmHg at rest or with provocation
    - e. Patient has had trial and inadequate responses to both of the following (unless there is a clinical reason why they cannot be used by the patient):
      - I. Non-vasodilating beta blocker (i.e., atenolol, bisoprolol, metoprolol)
      - II. Non-dihydropyridine calcium channel blocker (verapamil, diltiazem)
    - f. Prescriber is, or has consulted with, a cardiologist

### III. AUTHORIZATION PERIOD/LIMITATIONS

- A. Initial approval may be granted for 6 months of therapy
- B. Approval for continuation of therapy may be extended in 6-month intervals with submission of the following:
  1. a new echocardiogram LVEF assessment
  2. documentation showing the patient has had a positive response to treatment
- C. Limitation: Camzyos will not be approved for continued therapy in patients with LVEF < 50%, symptomatic heart failure, or worsening clinical status

### IV. EXCLUSIONS

- A. Camzyos will not be approved for the following:
  1. Concurrent use with the following:
    - a. Moderate to strong CYP2C19 inhibitors or strong CYP3A4 inhibitors
    - b. Moderate to strong CYP2C19 inducers or moderate to strong CYP3A4 inducers
  2. Any indications or uses that are not FDA-approved or guidelines-supported
- B. The use of physician samples, or manufacturer product discounts, does not guarantee coverage under the provisions of the medical and/or pharmacy benefit. All pertinent criteria must be met in order to be eligible for benefit coverage.

### V. RECOMMENDED DOSE

Please refer to the FDA-approved prescribing information for indication-specific dosing details.
