I. REFERRALS FOR MENTAL HEALTH SERVICES IN GRADUATE MEDICAL EDUCATION

Program directors may identify a resident or clinical fellow who they believe would benefit from mental health services or professional assistance managing stress or change. In rare instances the program director might determine that engaging in mental health services is not just recommended but needs to be a condition of employment. Johns Hopkins has mental health services available at no cost to the resident or fellow. The two main resources are described here: The MySupport Employee Assistant Program and Mental Health at University Health Services.

If you have questions about which service to choose, when to refer, how to monitor the learner's progress, and how to document these actions, please contact the GME office.

II. MySupport Program

<https://hr.jhu.edu/benefits-worklife/support-programs/>

Phone: 443-997-7000

Televideo or in-person appointments

In-person locations at JHH, Bayview, Johns Hopkins at Eastern.

MySupport OnSite clinicians see clients on weekdays between 9a and 5pm, with some appointments starting at 5pm.

Callers can speak to a licensed clinician 24/7/365 by calling 443.997.7000.

MySupport is the employee assistance program of the Johns Hopkins University, Johns Hopkins Medicine, and Community Physicians. MySupport provides offers free, confidential services to assist with mental health problems and emotional well-being. Clinical staff members are licensed mental health clinicians (licensed certified professional counselors and licensed clinical social workers) and will refer clients to outside mental health treatment providers as appropriate, including those at University Health Services Mental Health.

Services include short-term counseling (in person, by telephone or tele-video), resources to help with management, and crisis response services. Clinicians perform an assessment of emotional wellbeing and current stressors, and short-term counseling during times of grief, loss, stress, challenge, and transition. They also provide referral to mental health treatment providers when necessary for treatment of clinical depression, anxiety disorders, and substance use disorders.

MySupport Services Offered

- Crisis intervention: 24 hour crisis coverage by calling 443-997-7000.
 - The resident or fellow can contact MySupport themselves; however, for crisis intervention it is recommended for a faculty member to make the initial contact to notify them of the specific concerns.
- Assessment: Trainees are eligible for assessment and short-term assistance for managing interpersonal and other work or family-related problems. If longer-term assistance is appropriate they may be referred to outside resources.
- Brief, supportive counseling: Arrangements can be made for brief, time-limited support and coaching sessions for situations or concerns that can be adequately addressed in a few meetings. In general, if it is felt that improvement will require more than 5 sessions with a MySupport clinician, a referral will be made to a treatment provider. It's important to note that while MySupport provides short-term support, there is no limit to how often a trainee may return there for support if they encounter new challenges.

III. UNIVERSITY HEALTH SERVICES – MENTAL HEALTH

https://www.hopkinsmedicine.org/uhs/university_mental_health.html

Phone: 410-955-1892

MySupport referral as a condition of employment or as a facilitated referral

If a trainee's ability to function effectively is impaired (e.g., mental health concerns, emotional problems, substance abuse, or behavioral concerns), a referral may be made as a facilitated referral or as a condition of employment. In both cases it is important that the program director or other faculty member contact MySupport to identify the trainee in question and to describe the reason for the referral. In cases of facilitated referral, reports to the program director will be contingent upon the trainee approving disclosure of that information. When referral is a condition of employment, compliance with and progress with recommended interventions are provided to the program director as part of the condition of employment. Documentation of the reason for referral is extremely important in both facilitated referrals and in referrals as a condition of employment.
