Keywords: CCSE, CCSE exam, remediation

I. POLICY

NOTE: On May 14, 2020, the Undergraduate Medical Education Policy and Curriculum Committee approved that the 2020 Comprehensive Clinical Skills Examination will be formative with no pass/fail threshold.

A student who fails their first attempt on the CCSE must successfully remediate the exam in order to meet graduation requirements. In order to successfully remediate, the student must pass all components (Hx, PEx, Note, IP) on the remediation attempt, regardless of the student's performance on those domains on the first attempt.
